## 2010 Parent Survey

What additional course offerings would you like to see made available to the students in the Olmsted Falls School District?

Answered Question: 370 Skipped Question: 362

Number	Response Text
1	Foreign language in elementary schools
2	None.
3	Life Skills (Balancing a check book, building a resume, interviewing etc.)
4	Not really sure
	More advanced technology classes in the younger grades.
5	Conflict resolution throughout all the schools
6	Exposure to the main Chinese dialect.
7	Work Program within the school (Middle) for students to start to learn responsibility.
8	N/A
9	none
10	Bring back business classes at the High School
	start foreign language much earlier than 9th grade
11	Offer HS students introductory classes in areas that could lead to a career pathmedical, accounting,
12	?
13	not sure
	A progressive, continuous, early 2nd language class to primary, intermediate, and middle school students
4.4	that are secure in their English/Reading capabilities. With the business markets becoming more global, all
14	companies are already looking for bilingual employees. It's proven that the earlier a language is learned, the
	easier it is for the student and the longer it stays with the student.
	How about life skills? Writing/balancing a checkbook? Keeping a budget, etc.
15	More keyboard work for the computer when younger. My 8th grader still types so slow, yet is epected to do
	much of her work on the computer.
16	More access to post secondary. Less, far less, on non-core curriculum.
17	on the job training[]
	STEM activities
18	more "life skills" at an earlier age, budgeting, banking, etc
19	Typing - in an age of texting/emailing/etc. Kids need to learn to type to improve efficiency. More foreign
	language options. More hands on experience with the real world of making a living.
	Courses on the constitution, on government and the impact it has on business, courses on finding a job, or
20	starting businesses, entreprenurism, how to operate in a globalized econonomy, the impact that social
	networks like Facebook have on your life, and your career (this is very serious these days). More hands-on
	"internship" opportunities.
21	Class that give the student college credit. A head start is nice to have.
22	Orchestral
	Asian languages for all grades
23	Chinese
24	I cannot think of anything that isn't already available.
	Language opportunities EARLY. I think this is one area where we fall short. Even if we had an outside of
25	school program, extra-curricular program on a pay basis. That would be fantastic.
25	Also, some kind of self-esteem, self-management, self-help and the early grades. Academics are critical to
	our success, but without people skills those benefits diminish.
26	None that I can think of
	GermanI
27	меннаніі П
	Business classes including international business
28	political science
	public speaking
29	There should be more science choices and the advanced math should begin at a younger age.
	more chedia 20 mere colonice choloce and the davanced math chedia begin at a yeariger age.

unknown  July dull like to see more courses that prepare the students for real-life expereinces. American Sign Language  Accounting or Finance  Business Communication  Public Speaking		Nutritian discussed in Health without emphasizing obesity in the US, more to allow the understanding of a healthy lifestyle versus scaring the student.
Accounting or Financel Business Communication Public Speaking	57	
59 More tutoring!		Accounting or Financel  Business Communication  Public Speaking
	59	More tutoring!

60	Since one of my children is not in school yet and the other is in 2nd grade, I don't know of the various course
00	offerings that are available at the upper levels to make an informed opinion.
61	More computer-related courses. More courses to get students ready for college, both socially and academically.
62	Return the courses that were removed.
63	German  computer networking and languages
64	Drivers Education & Tolerance
65	foreign languages at earlier grades.
66	Dance and cheerleading for younger age girls.
67	reinstitute some of foreign language options, common sense classes that will help all students function better in society (ie. personal finance - how to use a check book, how to balance a budget, etc.)
68	More real-world exposure via internships in order that students have a broader view of the skills that are needed to achieve their dreams and can value the lessons-learned from their educational experiences.
69	We're only at the middle school levelI don't yet know what's available to the kids at the high school level. I think the offerings at the middle school have been outstanding and challengingboth of our kids have taken advantage of the advanced classes offered if they have met the criteria.
70	Interpersonal skills - mainly because the computer age is changing the amount of interaction that kids are getting and interpersonal experience.
71	not sure
72	possibly a rotc course
73	I'm not familiar with the upper level schools enough to know what is and isn't offered.
74	Latin
75	Basic finance. What is a 1040? Balance a debit account on paper and on a spreadsheet. Understand that when you purchase a house on a 30 yr. mortgage you will pay for it twice and on a 15 yr. mortgage you will pay far less. Understand when you are 10 years into a 15 year mortgage, a large portion of your payment is going to principal, if you re-finance almost all your payment goes to interest. Know a scam when you see one, like "credit card fraud protection" or "free credit reports". Learn the reason establishing a good credit history is important. For some reason, most of the recent graduates I talk to have no clue of these things.
76	orchestra
77	Our oldest is in first grade so I'm not really sure what's available yet as they grow older.
	Additional advanced sciences in the high school such as anatomy and physiology; ecology, perhaps
78	microbiology. Space and computer technologies
79	n/a
80	More work related.
81	To Many as of now, keep everything the way it is.
82	Foreign languages at an earlier age
83	Foreign language at a younger grade level.
84	Not sure at this time. My child is only in 1st grade and the course seem fine.
85	more blue collar type classes
86	I am not familiar with middle school/HS course offerings.
87	Technology classes
88	I think a language option should be available from an early grade so a child can be proficient in at least one
89	other language. It never hurts to have that in preparing for the future.  More real life skills, how to handle money, checking, home repairs home ec and industrial arts. While as a parent money issues are something we taught at home, along with home ec and basic home repair, these are not required in school as they were at one time. These things didn't disappear in the real world. More physical education classes, back to 4 years worth. The children are so much fatter, unhealthy and out of shape today, it's disgusting.
90	MORE SERVICES FOR GIFTED STUDENTS.
91	n/a
92	I'm not familiar enough with the course offerings
72	I m net termier enough mar are obtree enounge

	Bible Theology, Advance Computer programming and computer repair, Money matters (to teach our children
93	how to manage their money), Business (how to really start your own business, operate and succeed What
- 04	they don't teach you at Harvard).
94	We have plenty!
95	business related classes, more foreign language at a younger age - not just two weeks of a few languages
96	Business Classes (Accounting), AutoCAD (not generic CAD), Computer Classes etc.
97	?
00	Spanish every year beginning in kindergarten.
98	More Gym and Art  More computer courses.
	I would like to see students be able to participate in band or orchestra without having to be in the marching band. We stress how music impacts our academic life but unless you are in marching band you can not further your music career and education WHY??? Kids practice and prepare since 5th grade and when they get to highschool they are cut off if they are not involved in that extra curricular. Why does an activity that takes place outside of school have such impact on taking it during school? What if families do not want
99	children to make that outside commitment due to other responsibilities, they are no longer eligible to participate in music.
	More advanced courses for those above average but those not necessarily in the top 25 %. If you score above average on the OAA then you should be afforded more advanced courses and not just on teacher recommendation. More technology courses should be offered.
100	Anything related to Problem Solving & Analytical Thinking
101	Unsure
102	Not sure. I don't know what is offered at the HS level yet.
103	Having a seventh grader, I'm not exactly sure what's offered at the high school level which is where I feel
104	students begin to be prepared for college or employment.
105	I would like music instruction and foreign language as extras for younger children
106	Foreign language of German- restore it.
107	Olmsted falls needs a rec center where some of the school responsability to extra activities would be redused.
108 109	Bring back the summer magic program at Falls-Lenox.  Anything that will benefit them so they will be successful adults.
110	Foreign language starting in the primary level.
111	On a health note, I hope the alcohol, drug, smoking and bullying education continues. I live within the two mile walking zone and am so sad to see the tremondous amount of kids smoking as they walk home from school. (I was also shocked when I moved here 7 years ago at how many parents and neighbors smoked here - sooooo much more than when I was growing up in Westlake - what's the deal?)
112	foreign language offered in K up through the grades. In differentiated instruction for HIGHER level learners, even as early as Kindergarten! In Real life money classes (that teach students how to balance a checkbook, deal with credit cards, loans, budgeting, etc.).
113	We've only been in this district for one year, and my daughter is only in second grade, so I am not sure if OFSD offers language courses before highschool. If not, than I would like to see that happen.
114	I have no recommendations for this category.
115	orchestra
116	Balancing a check book and every day life (cooking)
117	It doesnt matter. When you need passage of the next levy, that will be used as leverage.
118	health drug behavior
119 120	Career decision assistance
121	not sure  Languages, we are a global world and the more languages you can speak, the better your chances for decent
	employment.
122	none known at this time

400	Tr. 1100 C. 1
123	I would like see foreign languages started in elementary school. Ideally, before age 7!
124	none.
125	knowledge of what careers exist, which ones really have jobs available, what kind of schooling needed for
	these jobs and how long it will take,maybe some internship on jobs
126	I am very happy with the course offerings.
127	Career "exploration" type classes that you would be able to see/experience what various occupations actually
127	do and what type of education is needed and how early a student needs to start.
128	Foreign language at younger grades.
129	??
130	languages at an earlier age
131	More language classes, professional shadowing programs, debate/speech
132	More emphasis on learning disabled children
	A motivational class for under achievers. Kids in their early teens need constant and consistent good
133	mentors. Without this, kids will fall through the cracks, and before they know and realize that they took the
	wrong road it might be too late to catch-up.
134	I'm not yet familiar enough with the courses to comment.
135	I can't say that I can answer that yet. My son is not in high school yet.
136	Return of all the ones you've cancelled.
137	Id like to see the foreign languages come back different from just Spanish and French
107	As of right know where both of my children are in the school system I think everything is terrific, I would look
138	at children who are excelling in elementary and intermediate school ways to challenge them some more so
100	they don't get board.
139	tutor for grades 3rd thru 8th if neded,dont wait til they get to high school!
140	Not sure
140	i would like to see offerings stay about the same but when eliminating classes have them offered if they fill
141	this works well with arts type classes and electives and everyone should know how to seek and interview for
'4'	a job a basic skill that we often forget to teach
	I think the courses offer at this time are sufficient. As we are working to cut spending adding additional
142	
142	courses should not be a priority at this time.
143	I think the current offerings are fine.
144	Business courses. Professional behavior. Personal marketing.
145	speaking on behalf of Lenoxthey are doing ok!
146	More languages.
147	NA
148	Only the essential for college preparation courses.
149	More like skills, other than just cooking or sewing. Life issues such as, handling stress, death of a loved one,
	dealing with others who are unkind to you
150	I cannot comment on
151	not sure
152	Foreign language offering for ECC-F/L schools, especially if the F/L day increases or when full-day
	Kindergarten comes.
153	I have students at the elementary level and so I don't feel I know enough to answer this.
	Classes on self esteem & bullying. NOT A QUICK 40 minute assembly. A 9 weeks course where they have to
	pay attention 1-3 days a week & actually learn. This is the key to many of these childrens problems. This
154	should start in grade 1 and end at grade 12. This should be a requirement for all students. This is how we
	produce confident, compassionate citizens. Anyone can produce a bunch honor studentsbut try to
	produce honor roll students who love one another, who care about their fellow students & who will stand up
	when someone needs help, this is what I challenge you to do! Have fun :)
	I would like to see foreign languages being offered earlier. I would also like to see children given the option of
155	a regular music class or learning an instrument in primary school. Even if the parents had to furnish the
	instruments.
156	more math tutoring for those having a harder time. healthier offering of foods
157	Foriegn languages - spanish and french at the primary school level.
158	Economics
159	Additonal language choices.
103	radicinal language choices.

	accounting
160	business
100	germanl
	communication/speaking
161	More life-skills
162	More courses in how to budget money, prepare a resume, and prepare for job interviews.
163	na
164	How about some life skills classes, like cooking?
165	more advance placement
400	I can't say I can think of a particular thing but I think they should be taking courses that relate to real life such
166	as money management or even a course that teaches the students good study habits because that will
167	enable them to have more independence when they leave school.
168	My children are too young for me to be that involved in those decisions at this time.  Polaris classes, if not offered already.
169	not sure
103	Sales classes along with public speaking. I would also like to see the kids get a chance to listen to
170	inspirational/motivational speakers. Thoughts become things and it would be nice to see the kids filled with
''	more positive thoughts.
171	How to manage a checkbook
172	Not sure as of this time
	More foreign language at a younger age. Wished the Chinese could be continued or offered at HS. I
173	More classes that will give the kids a heads up at college or let them know how to compete with the rest of the
1/3	world in education. More options if we don't have a class how they can get a class elsewhere even if it is a
	virtual classroom.
174	Maybe some more language courses. Other than that I feel we are pretty well rounded.
175	Chinese, more computer/technology courses
176	
	Computer Science/Programming
	Computer Animated Design studies
177	A track based system, not this "Vanilla" education system. A student excelling in science should be able to follow a "Science" track, same for Technology, Math, Bio-studies, etc. This would better prepare students for
177	college that choose to major in these fields of study. How about legal studies too. Polaris grads have no
	"Real" certifications to move into the job market, and that system is obsolete. The "Trade" job market is all but
	gone in NE Ohio.
	More home economic courses including fashion design and sewing and other possible business owning
178	classes that Polaris doesn't have.
179	More diveristy in the musical areas would be amazing to have.
180	Home economics
181	I think we other more than enough
182	am very happy with course offering such as polaris
183	Employability courses. Many students will be working immediatly after graduation or while they are in college.
184	foreign languages (especially spanish) offered early in the education process. Kids who learn a foreign
	language at a young age, learn it more easily and are more likely to retain and become fluent
185	I would like special ed kids to be allowed an additional period of instruction in math or reading in place of
	study hall or life skills.
186	the course offerings are good, I would just like to see students that need help get the help that they need.
187	Business classes.
188	Typing!!! (computer keyboarding doesn't count - teach the old system!)
	German Ge
	Basics for everyday living, like balancing a checkbook, paying bills, using credit wisely, MAKING CHANGE
100	WITHOUT A CALCULATOR OR CASH REGISTER TO TELL YOU HOW MUCH NEEDED
189	Budgeting, resume writing and interview skills for graduates

	N. A.D. I
	More AP classes at HS and make it easier for students to do PSEO. I would like to see foreign language
190	pushed down to lower grade levels. I would like to see a business/ accounting cirriculum at the HS, in
	addition to more technology related courses.
191	Would like to see foreign language courses offered at the middle school for high school credit
	Business Education
	Starting with 2nd or 3rd Grades on up courses and financial planning, saving, money, how to handle money,
192	bring in financial professional's to provide seminars or develop a course.
ĺ	More forgien language courses
	Job (career) education
193	unknown
194	More tutoring.
195	no opinion
196	Classes in other foreign languages such as german and arabic
197	See below.
198	At this time I think there is a good variety of classes for students at the high school level. I am not familiar
	with the lower schools since we do not have students at those levels any more.
199	more music programs
200	More than just marching band and choir. Why not an orchestra?
	I think German was eliminated a few years ago, so it would be nice if we offer Spanish, French, and German
	as well as Latin. More woodshop classes on the quality level of Mr. Odin, who retired. Lifeskills classes that
201	teach kids how to manage money, do laundry, sew on buttons and do mending, nutrition and how to buy
	nutritious food on a budget, how to fill out job applications, etc. that kids don't seem to learn at home today.
	And then there are probably always more AP classes out there.
202	None
203	all day kindergarten, mandarin
204	More life skill classes to prepare them for real life after they get out of school
205	more on real life less on face book life
206	more foreign language offerings at the high school
207	I think in PreSchool and Kdg, foreign language should be taught.
208	Music Theory, additional honors classes so students do not get left out.
209	I'd like to see some mandatory courses focusing on nutrition, health and wellness.
	Courses focusing on the ecology and better ways to keep our planet green.
210	My children are younger and have not entered high school yet.
211	I think what Olmsted Falls offers now is already outstanding! If anything maybe more tutoring in certain
010	subjects that children are having a hard time with.
212	Beginning in second grade, require a laptop or similar device.
213	Multitude of foreign language options. I really think classes should start early, 2nd grade even. I didn't have
014	that option until 9th grade, and it was way too late for me.
214	Spanish emersion programs at a younger age.
215	none at the moment
216	Engineering prep, health care prep I have children at FL and OFIS, so I'm not familiar yet with what MS and HS offers. I would like to see a
217	
218	foreign language offered at OFIS, or at least an introduction to one other than Chinese after school.
219	na German
220	Not sure at this time.
220	computer[]
221	business math
	I think society would do better if we offered kids a class on work ethics to be continued in college, especially
222	in MBA programs and law school. Not just don't cheat or you will get in trouble, but why people shouldn't
	cheat or steal or lie.
222	
223	unknown 2nd language in the lower grades. Learning an instrument in the lower grades
224	2nd language in the lower grades. Learning an instrument in the lower grades.
225	I really think that with all the students having to work on the computer for reports, etca keyboarding class should be put back in as a class at the Internmediate level or middle school level.
226	Other languages, Chinese for example, advanced technology classes, keyboarding at an early age

227	none
228	Foreign language at the primary level should be standard as in all other developed nations.
	More technology-based programs to prepare students for the workforce. Writing classes- creative writing,
229	business writing. Gifted programs for those students who might not make the "cut" in all areas but are gifted
	in a particular area.
230	not enough information to answer thiskids are still young
231	Sports strategy class
232	offer courses for the transition from high school to college
233	Why saving money is important and how to save.
	Courses to promote understanding of business and economics. Maybe classes that make them think and
234	practice starting or running a business of their own.
	(my son is only in fourth grade, there may already be classes and programs I am unaware of yet)
235	More hands on computer courses and more emphasis on writing.
236	n/a
237	Bring back Chinese
238	Offer Chinese Language classes in high school, offer keyboarding skills in elementary,
239	SAFTY
	HS - More foreign language and more AP classes. Expand the offerings for independent study - perhaps at
240	BW or other colleges in addition to at school.
	Invite the faculty to develop new courses.
241	n/a
	More student success classes. Things that will either teach a student how to manage money (i.e. loans,
242	mortgages, student loan debt, etc.) or prepare them for college (i.e. college life, planning/picking a college or
	major, etc.)
243	criminology, law, criminal justice
244	Spanish in elementary school. My friend's son is in first grade at St. Mary of the Falls and he is taking
244	Spanish now.
245	This may be offered but I am not aware of it; more college courses for high school students.
246	Unsure of the offernings that aren't currently available, so I can't easily answer.
247	Foreign languages at younger grades.
248	foreign language for elementary school children
	I have not had much experience above the intermediate school level, so I don't feel very qualified here.
249	I know one thing that is interesting is that my little man is learnign some sign language and that is cool!
250	automatic testing for learning disabilities to determine at an early age special needs
251	My students are too young to know what's offered later
252	Not really releveant to my experience.
253	German, if it is not currently offered. My daughter is only in 4th grade, so I am not familiar with upper level
	curriculum. So far, we have been happy with the offerings
	I believe at every grade level if a student begins to excel that they should be given more opportunities to
254	expand. A teacher may do this by discussing with the parent at first how to instill at home and/or along with
	the teacher. As a parent, I would be willing to work with my child's teacher to help my child excel.
055	foreign language an elective or more than a wheel class in middle school as a switch with chior
255	Polaris has many opportunities, but could industrial arts be brought into the HS ( wood shop, internet and
050	computer classes other than CAD )
256	Not sure
257	NA
258	I'd like to see the business courses come back.
259	A class that will take whatever the student picks to be his or hers career goal, and show that student how to
	obtain it.
260	not sure
261	No suggestions at this time.
262	Home ec. classes and the return of wood shop. The skills learned in these hands on classes are skills the
	kids will use for a life time.

	T
263	swimming!
	Music at a younger age! (band)
264	I would like to see AP Calculus BC and AP Physics courses in Olmsted Falls High School.
265	i think they need to bring back home economics to the middle school and make it mandatory students need
<u> </u>	these life skill and they don't always get them at home
266	More optional work to come home with the students to allow parents to work together with the teachers, even
	suggestions as to workbooks or reading etc.
267	Problem solving course for daily life issues. How to be a good listener/speaker. How to build up self-esteem.
	How to delegate without being bossy. True life skills.
000	study skills
268	Daily Life Skills- cooking, sewing
000	Job Skills
269	N/A
270	Basic life skills like balancing a checkbook, understanding credit, changing a flat tire.
271	more concentrated foreign language studies rather than just touch on , opportunity to play string instruments
	such as violin
272	More science, social studies with hands on content.
273	I'm not sure what courses are available in the higher levesl, so hard to answer.
	More cultural and artistic courses.
274	Mana shilla kara a sangara inka ka sadinana manahanina sanginana harabbanya affira adarin sanggaranina
	More skills type courses - into to culinary, mechanics, engineer, healthcare, office admin, community service
275	courses, etc
275	not sure
	Coursework that shows the value/purpose of their work (in the big picture). They should not have to attend a
276	vocational facility to obtain some of this information. Various introductory law classes (business, domestic,
276	internationsI, internet, etc.)  I
	Handwriting implementated after 2nd gradel (This is in many districts.)
277	Handwriting implementated after 2nd grade! (This is in many districts.)  Iatin 4
278	no suggestions at this time
	Creative writing, to give an Oration (maybe a speech meet), Science fair (you may have this, I dont know)
279	Art groups for after school
-	concerned about having all day kindergarden. was a room mother in my childs class and felt the pressure
	amongst teacher to get it all done. she was amazing but everything felt rushed. its not her fault it is just that
280	kids need to know so much these days in kindergarden its literally crazy!!!!! maybe the teachers need more
	assistance.
281	More in the trade field
	Basic typing and keyboarding skills at as young an age as possible. Kids are growing up with computers and
282	even smartphones attached to their hips.
	Industrial arts.
283	Modern foreign languages. Spanish and Latin should stay, French and German should go. Asian languages
	should be added from countries such as India, Japan, and China.
284	Preparing for life after high school resume-writing, interview skills, etc.
	Study skills, organiztional skills
	Teaching students to become self-directed learners
285	Bully Awareness/tolerance of all [
	Communication Strategies
286	I don't know.
287	Foreign Language should be being taught in elementary school.
288	more foriegn language and at a younger age.
289	none at this time, because there is not enough money!
	Advanced classes for younger children. Something hands on that challanges them. I think sometimes we
290	underestimate their ability.
291	Computers and Business Writing
292	business classes

Ī	
293	I am not sure what courses are offered at the High School level as my children are in the Primary and Intermediate schools but I feel to be competitive and successful upon graduation, they will have to be knowledgeable in all aspects of technology. Foreign language courses should be of importance as well.
294	How to fill out an application for a job and how to interview for a job. how to find a job that will work for you and your needs at the time. To prepare for life after High school and during college. Not a full year class but something that students over the age of 16 could do in place of a studyhall for a few weeks. I Yoga? due to the overwhelming hormones I think teenagers should learn how to focus in a different way other than just a classroom environment to better harness negative energy.
295	Extra College curriculum courses
296	focus on engineering, architecture, forensic science, bio-sciencell a varitey of 9 week classes in the arts
297	I think we are doing well. Maybe more classes offering college credit for our seniors.
298	Advanced Math and Science during high school  Provide optional courses related to their future college degrees.
299	Languages in lower levels (Spanish, French, Japanese, Chinese, Arabic, etc)
300	Foreign Language
301	Geography, 4 years of each language
302	More for every day life skills.
303	Diverse literature and creative writing courses would be an excellent addition to the English department at the high school level. Also, to bring back the home arts classes giving students basic life skills used on a daily basis.
304	Driver Education
305	Elementary level foreign language  Elementary level organized sports
306	While I realize that the State cut funding to Driver's Education, I believe that the public schools should provide a comprehensive program during the school day. Also, Home Economics should be a requirement as well. It is a real life way to practice and apply a multitude of seemingly "disjointed subjects".
307	I think students need more education to prepare them for the workforce and more entrepreneurial classes.  They also need critical thinking classes
308	programs for average students
309	There seems to be a balanced selection of courses for the kids some systems are overkill in what they offer
310	I feel that the children need to learn more of the hardships of the economy and how they will be able to cope with this and how they may be effected and what options they might have.
311	Stronger concentration in foreign languages would be nice.
312	n/a
313	I would like to see art available as more than just a wheel class for middle school. My child has an interest in art and is finished with it for the year already.
314	n/a
315	you should not force Spanish on all students!!!!!
316	Keep current foreign language offerings and add chinese. Foreign language options in elementary school.
317	Typing and Keyboard Class.
318	Study skills
319	not sure
320	More foregin language offerings. More classes that will teach them skills to prepare them for the outside world and college.
321	Can't really think of any
322	Anything to help our students keep up with the needs of 21st Century Education/Productivity in the world. Classes and ideals which emphasize innovation and invention! Connect creative ideas with hometown morals, and teachering kids how to deal with people on a human level, and not just through technology.
323	grade school level competitive sports

326		T

ן אסס ןאנ וחוא point, ו מסח'ז know.	355	At this point, I don't know.

356	I do not know what is currently offered to compare.
357	Business courses teaching life skills such as balancing a checkbook, paying bills, etc
358	German
359	Foreign language should be available in the lower grades.
360	technology based in the computer field, science based technology, business crouse etc
361	more basic living classes, most people in their 20's all have major creditcard debt, students need to learn how to survive in this economy. Finding jobs is great but if they don't know how to manage money it does not matter.
362	Chinese language courses for all students. Also, teach the students methods for learning. These methods include memorization techniques, effective study methods, and more. Teach the kids how to learn and what to learn. There should also be coordination with local colleges for additional programs at these universities. College classes can be integrated into a program of optional and/or advanced courses.
363	sign language
364	My children are all elementary aged and I am not completely aware of the offerings at the high school level.
365	Early opportunity to learn another language.
366	I'm not sure.
367	My students are not old enough to know what's already offered and what could be improved upon.
368	I would like to see more languages brought back; German, etc.
369	Class to show high school students basic life skills: how to balance a check book, write checks, manage their money, manage a credit card, interview for a job, etcl  Also, within the language arts curriculum, include a course of study on how to fill out a college application, write an essay to gain entrance into a college.
370	Reading, writing, math at the high school level that is not directly tied to the OGT and college prep.
